

# Controlling Compliance

Cloud Solutions Empower Government Contractors with Data Insights and Transparency

Leaders in U.S. aerospace, defense, and government contracting are looking to improve policy compliance while better managing their cash flow and spending in the year ahead. With many currently relying on internal systems that lack the transparency and reporting capabilities they need, they are considering making key investments to upgrade their travel and expense (T&E) solutions to modern systems that can provide the data and insights they require.

To dig deeper into these issues on behalf of SAP Concur, Wakefield Research surveyed 100 decision-makers for T&E solutions at U.S. aerospace, defense, and government contracting organizations with 500 or more employees.

## The Current State of T&E for Government Contractors

**22%** Average percent of expense reports being audited before issuing payment.

Respondents say their T&E processes are still:

Manual Don't Meet Regulatory Requirements

Disconnected Lack Visibility

Difficult to Use Missing Critical Reporting Functionality

## The Future of T&E in Government Contracting
